

Ksatria *Bintang Samudra*

AI Engineer · Automation & Solutions Architecture

AI-native engineer shipping production systems end-to-end — LLM gateways, payment-native automation, and field apps for mining and small businesses. I write the spec, orchestrate the AI tooling, and own every architectural and security decision.

AI engineer and solutions architect working across **LLM integration, payment automation, mobile field apps and edge infrastructure**. I pair spec-driven development with AI-orchestrated tooling (Claude Code, Cursor) to ship production software quickly — then verify every line, boundary and trade-off myself. Background in penetration testing and enterprise Google Workspace administration.

EXPERIENCE

Independent AI & Automation Engineer · Freelance (mining · automotive · education · own products)

Mar 2026 – Present · Remote

- Designed and built **CoalTrack**, a multi-tenant Flutter + Laravel platform for a coal-mining contractor: tamper-resistant attendance (server-time, device binding, mock-GPS rejection) feeding Indonesian payroll, bank transfer files and payslips.
- Built **Vensix**, an OpenAI-compatible AI gateway with live cost-based metering, QRIS top-ups and automated hosting provisioning (FastAPI, SQLite, OpenRouter).
- Shipped **Makmur Motor**, an edge-native car showroom and inventory CMS on Cloudflare Workers + D1 + KV for a dealership client.
- Runs **Lavelle**, a digital wedding-invitation studio: staff portal, Supabase RLS, one-click publishing to per-couple subdomains.
- Built browser AR teaching suites with teacher dashboards for education-thesis clients (MindAR, Three.js, Supabase).

Flutter Laravel FastAPI Cloudflare Supabase QRIS

● IT Systems & Google Workspace Administrator · Kalimantan Tambang Mandiri (mining)

Sep 2024 — Mar 2026 · Remote

- ▶ Administered the company's multi-domain **Google Workspace**: identity, access control, email and storage.
- ▶ Scripted backup and disaster-recovery routines and standardised restore procedures across domains.
- ▶ Ran documented monthly maintenance and built internal automation for provisioning, group management and audit reporting.

Google Workspace

Apps Script

Automation

● Freelance Penetration Tester · Upwork (international clients)

Jul 2023 — Jan 2024 · Remote

- ▶ Performed black- and gray-box assessments on **10+ web applications**, focusing on injection, broken authentication, access-control bypass and business-logic flaws.
- ▶ Delivered OWASP-aligned reports with prioritised findings, proofs of concept and remediation guidance.
